PROJECTS

1. CitySathi- Smart Civic Issue Reporting System | CitySathi (Full Stack Application)

- Developed a citizen-centric civic issue reporting platform using React.js for frontend and Node.js with Express.js for backend, integrated with Firebase (Firestore + Storage).
- Implemented features for user authentication, complaint submission with image upload, automatic geo-tagging, and real-time status tracking.
- Designed a role-based dashboard for authorities to view, verify, and update citizen complaints and generate analytical reports
- Utilized REST APIs for smooth frontend-backend communication and ensured responsive, accessible UI using modern React components and Tailwind CSS.
- Developed a **Machine Learning-based image Classification system** to automatically categorize civic issues such as: garbage, pothole, drainage problems.

2. AI Resume Analyzer (In Progress) | Full Stack Application

- Developed a full-stack AI Resume Analyzer using **React.js**, **Node.js**, **Express.js**, and **MongoDB** with secure JWT-based user authentication.
- Implemented **PDF resume parsing**, ATS score calculation, and keyword-based analysis to identify matched and missing skills.
- Built an interactive dashboard featuring **charts**, resume summary, dark/light mode, and professional UI for resume analysis.
- Generated professional **PDF reports** with company branding, QR code, watermark, summary tables, page numbers, and signature section.
- Developed **Resume Analysis History** with search, view, and delete functionality for managing previous analyses.
- **Currently enhancing the application with AI-powered resume suggestions and Job Description (JD) matching.**
